Tips to grow your very own Pumpkin King!

- Give your pumpkins time to grow by starting after the last frost, but no later than June. A pumpkin takes 90-100 days to grow.
- Choose a sunny location, blend soil with compost and grow them in a mound.
- Give them room. Pumpkin vines like to roam.
- Keep them fed. Give them lots of water and nutrient-rich compost.
- Keep them trimmed. All the nutrients flow to growing a big healthy pumpkin and not to feeding a huge plant that won’t produce fruit.

### Cinnamon Sugar Pumpkin Seeds—YUM!

**Ingredients:**
- 3 tablespoons butter, melted
- 1 teaspoon ground cinnamon
- ¼ teaspoon salt
- 1½ cups pumpkin seeds
- 2 tablespoons white sugar

**Instructions:**
1. Preheat oven to 300 degrees F.
2. Mix butter, cinnamon, salt and sugar together in large bowl. Add pumpkins seeds and stir to coat.
3. Spread seed mixture in a single layer on a cookie sheet and bake for 40 min or until golden brown.
